

REVISED 08/25/06

WAC 246-808-505 CLASSIFICATION OF CHIROPRACTIC PROCEDURES AND INSTRUMENTATION (2) The commission shall maintain a classified list of chiropractic procedures and instrumentation. This list shall be made available upon request.

The following have been approved by the Chiropractic Quality Assurance Commission:

Activator Adjusting Instrument & Technique
Anatometer
Applied Kinesiology (AK)
Aqua-dry Hydrotherapy Tables
AquaMed Dry Hydrotherapy System
Arthrostim Adjustor
ASBE
Atlas Orthogonal - Sweat Adjusting Instrument & Technique
Autonomic Syndromes
B200 - ISO Technologies
BackMan Power Massage Table
Barge
BEST Technique
Bio/Analogics – ElectroLiopGraph
BioFlex Low Intensity Light Therapy (LILT) System
Biotonix.com – Tonix System
Blair Analysis and Adjusting Technique
Body Composition Analysis
Bone Density Scan –Dexa Scan
Chiropractic Biophysics
Chiropractic Network
CMT 1000 TM
Cold Lasers and Low Intensity Lights
Cox Technique
Deep Muscle Goadng
Dexa Scan – Bone Density Scan
Diversified Technique
DNFT - Van Rump
Dynatron 2000
Electrode Paraspinal Electromyography (EMG) - Surface
Erchonia Therapeutic Lasers
Evaluation and treatment of autonomic syndromes
FET 5000
Futrex 5000 and 5000A Body Fat Analyzers
G5
Gonstead Technique
Graston Technique
Grostick

Harrison – Integrated Drop Table Technique
 Integrated Drop Table Technique – Harrison
 Intersegmental Traction
 ISO Technologies – B200
 Jennetics procedure and Instrument
 Leander Technique
 LLIDO Back System
 Logan Basic Technique
 Magnetic Resonance Imaging (MRI) – Chiropractors may own and operate an MRI unit consistent with all applicable state and federal laws and regulations.
 Massage
 Med-X Unit
 Metrocom
 MSM 5000
 MSM 7000
 Myofascial Release
 Near Metabolic Reintegration (NMR)
 Network Spinal Analysis
 Neuroemotional Technique (NET)
 Nimmo Technique
 Noromed MES 9000
 NUCCA
 Osteo-Tech 1
 Pettibon Adjusting Instrument & Technique
 Pettibon Tendon, Ligament and Muscle Stimulator (PTLMS)
 Photonic Stimulator
 Pierce Technique - Stillwagon
 Posture Pro Full-Spine Posture Pump
 Pro Adjuster
 PulStarFras (c)
 Referral for and interpretation of all diagnostic imaging methods
 MRI
 Radionuclide Studies
 Diagnostic Ultrasound
 SOT
 Skin Temperature Differential Instruments
 Spinalaid Instrument
 Spinolator
 Static Traction
 Stillwagon -Pierce Technique
 Stress Machine
 Surface Electrode Paraspinal Electromyography (EMG)
 Sweat Adjusting Instrument & Technique - Atlas Orthogonal

Talsky Tonal Chiropractic
Tapping Instrument
The Thumper
Thermal Imaging Processor
Thermography
Thompson Technique
TMJ Treatment
Toggle
Toftness Adjusting Technique
Tonix System – Biotonix.com
Torque Release Technique and Instrument
Total Body Modification
Tracker
Trigger Point Therapy
Urinalysis
Van Rump –DNFT
Video Fluoroscopy
Vivatek
X-Ray Digitizing

Devices that are shown to have reliable reproductibility are acceptable for range of motion.
Individual traction devices do not need Commission approval.
General rehabilitative exercise procedures are accepted by the Commission, however, devices that have combined diagnostic/analytical/rehabilitative components must be pre-approved.

RESEARCH OR INVESTIGATIONAL

BioPhotonic Scanner

Diagnostic Ultrasound Scanner

Magnets

Spinography

Toftness Detection Device, Resonator or other like devices.

NOT APPROVED

Bio-Energetic Stress Test – Galvanic Stimulation Computerized Device

Biomeridian – MSA21-BTAS-200SG

Breast Exams

Chiropractic Stressology (c)

Infratonic QGM Therapeutic Massager
